

RankEm 2005

Group Ranking Reports

RankEm 2005 gives you local access to group rankings and benchmark reports on your timetable – no waiting for the central reports to be published. Just install RankEm and load individual FINAN reports into a local database, then select measures to create the reports that are most useful to your producers.

Percentile Rankings graphically benchmark individual producer's whole farm, crop, and livestock enterprise results against the group -- results are in ten percent increments from lowest to highest performance. You can highlight an individual farm to show where that farm ranks on each measure. The result is a very powerful, visual tool that will help producers identify the strengths and weaknesses of their operations in comparison with other producers.

Whole Farm; 266 Farms								
	My Farm	Group Median	10%	20%	30%	40%	50%	60%
NFI Before Ownr Wages (cost)	47,445	28,469	-35,049	-7,398	5,731	13,502	22,661	34,620

Group Listings list results for each producer in column format. Select measures from the entire FINAN analysis to include in whole farm, crop, or livestock enterprise reports. For example, on a whole farm report, you might select Net Farm Income, Rate of Return on Assets, Rate of Return on Equity, and several other financial measures. Each measure is listed in a column showing, from highest to lowest, the results for the group. You can even have RankEm highlight the measures for an individual farm (highlighted in yellow below).
